Nr. 113/26.IV.2024

ACTIVITY REPORT - April 2024

ACTIVITIES CARRIED OUT:

SPORTS AND ORIENTEERING - was the generic under which sports and orienteering activities on the field have been unrolled, using various techniques and tools.

- The students of the 2nd Step by Step preparatory classes enjoyed a day full of sports and adventure. The interactive games and movement activities, the team hunting for sweet treasures, were an opportunity to strengthen the children's bonds and develop team spirit and collaboration.
 - The outdoor activity of class III C started from two clues: measurement units and the surrounding environment. Thus, the students debated and recalled the information about the near horizon, orientation in space, and units of measurement which they then practically applied to create the necessary directions to get from the school to a given institution in the city, such as a GPS application.
 - The preparatory and 4th Step by Step students had an interactive and fun experience of orientation in the field using simple maps. The main purpose of the activity was to help students find the control points marked on the map, follow the given directions, and stimulate and valorize teamwork, collaboration, and friendship.
 - Secondary school students, organized in teams of 6, participated in a spatial orientation activity in 1 Mai Park in Medgidia. The 8 spots on the field that had to be discovered hid sports questions that each team answered by completing a puzzle. The team that completed the puzzle and reached the finish line the fastest was declared the winner.
- Students and teachers selected at the school level to participate in the LTT activities organized in May by the partner school in Isola delle Femmine, Italy, took part in meetings with the project coordinator and preparation activities.
 - Relevant aspects of the activities were posted online.
 - The project map was completed with the related documents of April month.

OBJECTIVES ACHIEVED:

- using and developing orientation skills in varied conditions;
- capitalizing on basic motor skills under the conditions of integrated projects;
- carrying out outdoor sports activities and raising awareness of their importance for a healthy lifestyle;
- the development of positive character traits and the student's personality.
- the development of the competitive spirit, but also team collaboration, and the promotion of diversity and inclusion.

RESULTS:

- developing spatial orientation skills, stimulating critical thinking and problem solving, promoting collaboration and social skills, improving motor skills, and stimulating interest in outdoor activities and sports;
- promoting well-being among students;
- portfolios, photos, activity sheets and reports, minutes, and updated project map.

Project coordinator,
Florentina Mihaela Deli-Iorga
